Interpretation:	internal	<u>external</u>	western cellar wall, the earliest in wall in the structure. Belongs to an earlier cellar, the the one with the direct doorway to the barrel vault.
	It is abutt abutted by 3205 . We know that because 3207 has 2 more courses preserved in depth, the joints don't tie in and the mortar is different. 3205 has hardly any mortar left, washed out.
