E-W running drain in G. building (100 Minories)		
Peg tile roof has more than one layer of peg tiles on top. There are mostly 2 or 3 peg tiles on the top, mortared together (see sketch overleaf)		
The drain The bottom part of the drain is U-shaped - constructed with 2 stretchers on bed. Peg tiles used as a shim in the construction of the drain.		
Drain fall is from East towards west. The western end of the drain is truncated. Another, earlier drain found during exc. Not entirely sure where [4046] went to, was it linked to the N-S running drain [4059]?
