<p>brick had in vs aq minerals cesspit, earlier than the Georgian development, truncated by the cut for the drain [3974] and partition wall cut; [3828]. A curve in the wall suggests there may have been a drain run coming through but it is not clear where from. The curve is visible in the west facing section of the wall (see sketch arcade). There seems to be a void in the wall just north of the curve that has been filled with portland cement (see sketch).</p>
